

MICHIGAN MEN BUY COPPER PROPERTY

NEW JEROME VICTOR EXTENSION COMPANY TO DEVELOP FORMER HAYNES HOLDINGS.

(From Thursday's Daily.)

(By William P. De Wolf)

Capital for investment in Yavapai county mines and prospects has of late become available in increasing amounts. The East, Middle West, Pacific Coast, Great Lakes section and the South are financially interested in the mines of this county and are represented on the ground by mining engineers of acknowledged ability and repute. These men are favorably impressed with the ore-yielding possibilities of Yavapai county, and, as a class, hold the conviction that the mining industry of this section offers financial opportunities on a more diversified scale than elsewhere. In corroboration of that opinion they point out the fact that not alone gold and silver are being mined here at large profit, but also tungsten, lead, copper and zinc.

Prominent among those who have of late invested heavily in the mines here is a syndicate of Michigan men most of whom are prominently identified with the great copper mining and banking interests of Calumet. Backed by ample capital and having at its command the services of mining engineers who have made good the rich copper fields of the Great Lakes section, this syndicate has entered the local field with the intention of engaging extensively in mining copper. Its initial venture has been made in the Verde district, but it is understood the taking over of property there is to be followed in due course by investments in copper propositions elsewhere in Yavapai county.

Michigan Men Incorporate.

The property purchased by the Michigan people was formerly controlled by the Haynes Copper Company. It comprises eight claims, adjoining holdings of the famous United Verde, and was located by Chris Harryhausen at the time he was underground superintendent of the United Verde mine. The new owners of the Haynes group have incorporated the Jerome-Victor Extension Copper Company for its development and will list its shares on the New York and Boston curbs. The company is capitalized for 1,000,000 non-assessable shares of a par value of \$1 each. The initial authorized issue of 200,000 shares was offered to the public yesterday, and was oversubscribed within a few hours at par. The stock is very popular in Prescott, Jerome and throughout the Southwest in general. So popular, in fact, that it is now being traded in locally at an appreciable advance above par. The foregoing facts are mentioned as being indicative of the faith the people of Yavapai county have in the company and its copper holdings.

The officers and directors of the Jerome-Victor Extension Copper Company are prominently identified with the mining and banking interests of Michigan and are amply able to give the corporation the necessary financial backing. James T. Fisher, president, is cashier of the State Savings Bank of Larium, Mich.; Brainard Avery, vice-president, is a member of the law firm of Avery & Whiting, of New York City; J. B. Paton, secretary, is cashier of the First National Bank of Larium, Mich.; J. P. Petermann, treasurer, is president of the State Savings Bank of Calumet. The before mentioned, together with A. H. Floeter, A. F. Heidkamp and D. F. Printz, compose the directorate. Mr. Floeter is chief mining engineer of the Mohawk & Wolverine Copper companies; Mr. Heidkamp is vice-president of the Citizen's National Bank of Houghton, Mich., and Mr. Printz is a prominent manufacturer of leather goods at Reading, Pa.

Development Plans.

Development plans so far as outlined have in view the working of the property on an extended scale. To that end the old main-working shaft, located approximately 1,000 feet from the four-compartment shaft of the United Verde Company, is to be immediately unwatered so that the company's engineers may make a thorough examination of the ore bodies and lay out the lateral work which is to supplement that done to a depth of 1,200 feet during the Haynes regime, whose period of activity ended in 1914 owing to a lack of funds. Since that time a number of strikes of importance in the Verde district, more particularly in the vicinity of the

property of the Jerome-Victor Extension Company, has renewed interest in the mining propositions of the Verde district as a whole, and has been followed by a speeding up of mining operations there.

The recent sensational disclosures in the United Verde Extension mine—known locally as the "Little Daisy"—coupled with the very gratifying results of the diamond drilling operations in United Verde ground, played an important part in inducing the Michigan people to take over and incorporate the Haynes group. The company enters upon its campaign of mining activity with a development fund of \$200,000 and under mineral conditions indicative of mining success; the statement last mentioned being predicated upon the discovery of a remarkable deposit of high grade copper ore at depth in United Verde Extension ground—nearby—and the recent decision of the United Verde Company to install hoisting machinery having lifting capacity from a depth of 3,000 feet.

CAMP FOR CHAUTAUQUA MAPPED OUT

(From Friday's Daily.)

An advertising and ticket-selling campaign that will be hard to beat has been mapped out by members of the Chamber of Commerce and representatives of the Redpath bureau, for the Chautauqua to be given in Prescott the latter part of July.

The campaign will be started soon and representatives of both organizations will co-operate to make the week's program one of the biggest pleasure and educational events in the history of Northern Arizona.

A. P. Palmer, advance man for the Chautauqua, who was in Prescott recently, promised that the program that will be given here will contain more high class features than any ever presented in the West. Palmer explained that the Redpath bureau furnished all cards, dodgers, billboard signs and other advertising data, and all that the Chamber of Commerce will have to do will be to supervise the distribution of these in various sections of Northern Arizona. Much publicity will be given the Chautauqua in every district, and there seems little doubt but that the audiences at the 20 performances will be made up to a great extent of residents of Kingman, Phoenix, Jerome, Clarkdale and other cities, although the citizens of Prescott have promised to do more than their share to make the event a success.

POPULAR MENTAL SCIENTISTS ARE MARRIED

(From Thursday's Daily.)

Miss Edna Squire, of Washington, and Dr. Charles Hollingshead, of Camp Verde, were married last yesterday afternoon at Hotel Prescott. Judge F. O. Smith performing the ceremony.

Supervisor William D. Stephens, Mrs. Stephens, Professor Marañ and F. L. Haworth were among the several intimate friends who witnessed the ceremony.

The bride is a graduate of the Mental Science college of Bryn Mawr, Washington, D. C. She met Mr. Hollingshead at the Mental Science college in Phoenix.

Mr. Hollingshead is well known in Northern Arizona, being an old-time cowboy and horseman, but now engaged in cattle raising in Verde valley. He has taken a prominent part in Frontier Days celebrations.

The couple left for the northern part of the State where they will enjoy a short honeymoon.

OLD YARNELL MINE MAY SOON RESUME

(From Wednesday's Daily.)

General Julian S. Carr, of Durham, N. C., has concluded an inspection of the old Yarnell gold mines, being a large shareholder of the holding company, and is agreeably impressed with the property. Before returning to his home a few days ago, he stated that under prevailing conditions of mining activity, the present was an excellent time to revive this group, and he was receptive toward a movement to take early action therefore. It is quite probable, since General Carr has visited the property, that a reorganization may follow, and on plans that will permit of extensive exploration to be carried out at a very early date.

WICHITA PLACER CO. SWINGS INTO ACTION

(From Wednesday's Daily.)

O. O. Smith, general manager of the Wichita Placer Co., stated yesterday that the semi-hydraulic plant is in action and all new machinery installed a short time ago, is working satisfactorily, as well as the yardage handled up to the amount formerly estimated. He is well pleased with numerous conditions exposed, and while no cleanups have as yet been made, it is his opinion the project will be proven to be a handsome success. C. S. Israel, a principal of the company, has gone to Wichita, Kan., to consult with associates, and is expected to return in a short time. This undertaking is situated on Lyx creek, near the wagon road crossing,

MORE MACHINERY FOR THE C. B. S. COPPERS

NEW CAMP IN COPPER BASIN DISTRICT SHAPING UP; FAVORITE FIELD FOR NEW LOCATIONS.

(From Thursday's Daily.)

The last of the machinery for the C. B. S. copper mine, in Copper Basin district, consisting of a large hoist, will arrive in a few days from California, according to a statement made yesterday by M. Roland, superintendent, who has returned to the city after purchasing the hoist. He stated yesterday that this property has been active for the past three weeks in shaping up the old shaft and retimbering, and that large exploration will begin in a short time. The new compressor is in position, more camp buildings have been erected, and a modern equipment is ready.

Roland also stated that all intervening country from the C. B. S. to the Commercial, has been located, covering over two miles, and from the field activity noticeable it is believed the country is ready to begin the biggest exploration it has ever known.

"The Loma Prieta strike started the ball to rolling through Copper Basin, and everything in sight in any direction is now under a location notice," said Roland.

CATTLE MARKET

Special Correspondence.

KANSAS CITY STOCK YARDS, May 1.—Cattle closed last week with good prospects, which were realized today, when the 10,000 head that arrived sold steady to a shade higher, and actively. Light weight steers showed more strength than heavy weights, but all classes sold as well as anyone could ask. The feature was a heavy supply of good to choice pulp fed steers from Colorado and the West. About 50 loads of Colorado pulp fed steers sold at \$8.95 to \$9.40, highest range they have reached this year, and about 10 to 15 cents higher than last Monday. Seven cars of Idaho sold at \$9, and eight cars of Sugar company pulpers from Scattibuff brought \$9.35 straight. These pulp fed steers ranged from 1,145 to 1,442 pounds in weight. Choice natives were loading today, but if quality is good enough they are eligible to \$9.75, which was the top reached last week. Bulk of the natives sell at \$8.50 to \$9.25, and only a few short fed steers and dogies under \$8.50, down to \$8, the steers that sell under \$8 very common. Quarantine steers are very scarce, two loads of light steers, under 1,000 pounds, at \$8.15 and \$8.50, good quarantine steers worth up to \$9. Butcher grades show even greater strength than beef steers, prime heavy cows up to \$8.35, bulk of the cows \$6.50 to \$7.75. Stockers and feeders remain firm. Fairly good stock steers around \$7.75, choice ones \$8.50, feeders \$8 to \$8.75, fleshy feeders at \$9. The whole cattle list is on a slightly higher plane than a week ago, and the highest reached this year, with good prospects ahead, in view of the good outlook for meat.

Hogs held up strong last week, and prices averaged higher during the week than any previous week this year. The supply is 13,000 today, market opening with prospects to 10 to 15 lower, but it turned out to be steady to 5 lower, strength developing as the session went on, similar to the action of the market every day last week. Top today was \$9.85, bulk \$9.50 to \$9.80. Heretofore pork has been selling so well that killers cut carcasses for minimum lard production, but recent advances in lard promise to call for more hogs on the hoof, and strengthen the market. Dealers do not look for any material reverses during May.

Sheep and lambs advanced 25 cents latter part of last week, and jumped up 15 to 25 cents today, receipts 9,500 head, including 3,500 goats. Lambs sold quickly, largely at \$11.45 to \$11.60 nine doubles at the top price, including weights up to 83 pounds. Sheep were scarce and wanted, fed ewes worth \$8 to \$8.85. Texas wethers are worth up to \$7.75, ewes \$7.25, though none were offered. Goats sold a shade higher, with a good outlet for both fat goats, around \$5.60, and Angora brushers, some weighing 72 pounds at \$5.15, others 59 pounds at \$5.40, and Mexican slick haired goats at \$4 to \$4.75.

WARNING SENT OUT AGAINST FOREST FIRES

SUPERVISOR OF PRESCOTT NATIONAL RESERVE IS ANXIOUS TO PREVENT CARELESS ACTS.

In preparation for the coming dry fire season which commences about this time and lasts until the summer rains, Forest Supervisor Hinderer is sending out circulars warning all using the national forests of the danger of fires.

The forest service has arranged for the placing of permanent lookout men on Thumb Butte, Spence Mountain, Mount Julian, and Horse Thief mountain. All of the lookout points will be connected with Supervisor Hinderer's office in Prescott by telephone.

In his warning, the supervisor says: "The camper and prospector are requested and warned to be careful with their camp fires. Dig a pit for your fire or clear a strip around all sides of it. Be sure that your camp fire is out before leaving it. Be sure your match or your cigarette, or your pipe ashes, or your cigar is out before throwing it down in the forest. Campers and prospectors are warned against allowing and accumulation of inflammable material about their camps; and prospectors are particularly warned against allowing a fire to burn in their cabin or in their camp when they are underground mining. "Stockmen and their employees are requested and warned against building and leaving branding fires within the forest.

"Automobilists and tourists who use the roads through the forest are requested and warned to be very careful about throwing out of their machines cigarettes, cigars, matches or pipe ashes which are still burning and are liable to start a forest fire beside the road. Be careful to thoroughly extinguish your 'smoke' or to throw it on a barren place where it is not possible to start a fire. The same warning is extended to all travelers by any means of transportation over the roads or trails on the forest.

"Timber sale contractors are warned against the disposal of brush or debris during the dry season by burning, and this should not be undertaken during that season without the specific consent of the forest service. Timber sale contractors are also warned against the accumulation of inflammable material about their camps and concerning the care of fires in their camps.

"In case a fire is discovered by anyone on or near the Prescott national forest please telephone or communicate by some other means with any one of the forest officers whose addresses are listed below:

"Forest Supervisor, Chas. H. Hinderer, Telephone Black 190, (Supervisor's Office), Prescott.

"Forest Supervisor, Chas. H. Hinderer, Telephone Black 334, (Residence), Prescott.

"Forest Ranger, R. H. Zeiger, Telephone 9R2, Willow Ranger Station, Prescott.

"Forest Ranger, M. L. Nichols, Telephone 6R3, Groom Creek Ranger Station, Groom Creek.

"Forest Guard, Wm. Pratt, Telephone Long Distance, Mt. Union mine, 6R3.

"Assistant Forest Ranger, A. W. Fletcher or Forest Guard, Louis Hart Telephone Long Distance, Ranger Station, Crown King, Arizona.

"Assistant Forest Ranger, E. H. Oldham, Telephone Long Distance, Yeager Canyon Ranger Station, Jerome.

"In case you cannot locate the forest ranger promptly, please communicate with the supervisor's office or residence in Prescott. All charges for telephone or telegraph services in such cases will be promptly paid by the forest service.

"The act of May 5, 1900, provides a fine of \$1,000 or one year in prison, or both, for building a fire and leaving it before it is totally extinguished. Any officer of the forest service is authorized to arrest persons who violate this law, without warning, and it is the intention to prosecute willful offenders to the full extent of the law."

CHAMBER OPENS REAL ESTATE BUREAU

(From Saturday's Daily.)

In order that people coming to Prescott for the Summer may secure desired accommodations, it has been deemed advisable by the Chamber of Commerce to keep a list of furnished rooms and houses, together with places offering board, on file and to this end all parties having such accommodations are requested to drop a postal card addressed to the Secretary, Chamber of Commerce, advising just what is available and the price.

It must be thoroughly understood, however, that furnished houses and rooms must also be listed with one of the real estate firms before sending same to the Chamber of Commerce, as this organization will not interfere with the business of the real estate firms, but desires to offer an accommodation bureau for Summer tourists.

TUNGSTEN FEVER INFECTS THE COWBOYS

CAMP WOOD BRONCHO BUSTERS BY THE SCORE QUIT THEIR JOBS FOR THE METALLIC LURE.

(From Saturday's Daily.)

An arrival yesterday from the Camp Wood region, reported a cowboy stampede to the tungsten field that covers that range country for many miles. So virulent is the metallic infection that more than 20 employees have quit their jobs for the lure of the metal that has thrown the country into consternation and has settled down to an epidemic condition.

The infection is the result of a strike made a few weeks ago by Hill, Marlowe & Kootz, all rangemen. Marlowe, breaking away from his co-partnership later, started work on an individual claim, and is reported to have hit it right eight feet down. The news spread to other cowboys and other riata experts took the tip, and are also going to take a chance in what Marlowe has demonstrated as a big thing.

Said one cowboy after hearing of the strike made by his companion on the range: "What's the use of 'bull-dogging' a critter when a few flicks with the pick may give one a cinch in getting on top? Marlowe has no more knowledge of mineral than I, and the same rule applies to Hill & Kootz, his former partners."

This sentiment spread like wild fire, and the range bust-up followed. One large cattle owner lost the following day his seven riders, another four, and the total to date reaches to over 20. The rodeo for the Spring season is ready and the little calves as yet have not had the warm iron thrown on their bodies, neither has the sharp knife clipped off a piece to give them the necessary ear-mark of identity. A retired cattleman's relief association is being talked of to assist the big brethren of the range, in their present dilemma, to get into the saddle again and do a little rounding-up in this situation of a dire emergency arise without a moment's warning. Tom Anderson stated yesterday he will volunteer to bust the stampede, as he wants to get in the cattle game again anyhow, and believes that now is an excellent opportunity to get a line start.

PREMONITION OF DEATH WAS FULFILLED

(From Saturday's Daily.)

During April, the death by drowning of a boy named Harris Williams, occurred near San Luis Obispo, Cal., while the lad was swimming with companions. The deceased was a resident of this city, with his parents, about three years ago. According to a Los Angeles paper a similar fate has overtaken a friend of the Williams' youth, and under practically the same conditions. The boy drowned early this week was named Willie Snyder. He also was seized with cramps while swimming. He informed an uncle after his playmate was gone that he, too, sooner or later, would be called away by the same cause. In this belief he persisted, and frequently mentioned the matter to relatives and many young friends. He had been in swimming, however, several times, and on each occasion mentioned what he earnestly believed would be his fate. His premonition was fulfilled, and when his body was recovered, the reason given for death was attributed to the same cause which overtook his companion, only a month before.

TIPTOP TUNGSTEN COUNTRY IS LIVELY

(From Thursday's Daily.)

John Lindell returned yesterday from the Davis tungsten mines in which he is interested with N. H. Getchell and others. He reported the Tule Creek field as lively, with many operators coming in daily. Prospects were scouring the country as well. Castle Hot Springs, he says, is now the gateway to that section of Tiptop district, to which the trip by auto can be conveniently made from Prescott, and thence by horseback to the place desired.

NELLIE BLYE BOUGHT BY VERDE EXTENSION

(From Saturday's Daily.)

A deal, through which the United Verde Extension Mining Company came into possession of the Nellie Blye claim in the Verde district, was made yesterday. John Roark sold the property to Joseph H. Layman for \$3,500, the latter turning it over to the mining company for the same consideration.

OLD YORK CLAIMS SOLD

(From Saturday's Daily.)

The Old York Mining and Milling Company has sold to John S. Rielly, E. L. Bartholomew, Joseph A. Rees and James Rees, the Hillside, Protection, Old York, Lottie, Quartzite and Dearborn claims, the transfer taking place yesterday.

RATES REDUCED ON CANNED GOODS

(From Wednesday's Daily.)

Effective May 1, 1916, the rates on rice, carloads, from San Francisco and Los Angeles rate points to Prescott were reduced by the Santa Fe from 75 cents to 60 cents per 100 pounds. On condensed milk, liquid or dry, the new rate will be 67½ cents from both Los Angeles and San Francisco as compared with the old rate of 83 cents from the former point and 85 cents from the latter. The rate on canned fruits, meats, fish, vegetables, etc., will be 75 cents per 100 pounds from both Los Angeles and San Francisco as compared with the old rate of 83 and 85 cents respectively. These are very material reductions and the householders of this vicinity should be very much interested as the reductions named cover articles that are consumed to a great extent in this locality, and will, no doubt, be reflected not only in the prices of the wholesaler to the retailer, but in the prices of the retailer to the consumer.

RICH COPPER FROM RIP VAN WINKLE

(From Thursday's Daily.)

Superintendent John Morrison, of the company operating the Rip Van Winkle copper mines of Thumb Butte district, placed on exhibition yesterday in the rooms of the Oatman-Prescott Brokerage Co. samples of the product developed at a depth of about 60 feet, which would indicate that a very attractive proposition is being opened up.

Assay certificates accompany the samples and show a high-grade copper, with bi-metal values as well. This property was taken over a short time ago under a bond by Colorado operators and had been owned for over a third of a century by Clark & Adams, who in early days acquired a patent for the 160 acres for the timber thereon, and performed but little development. The title of Rip Van Winkle results from its long slumber of inactivity.

WAKOTA PEOPLE TO HAVE NEW QUARTZ MILL

OLD MINE REVIVED HAS BIG ORE TONNAGE; SATISFACTORY DEVELOPMENT CONTINUES.

(From Saturday's Daily.)

So satisfactory has been development in recent months in exposing an immense ore tonnage, that the Wakota Mining Company will erect in a short time a ten-stamp mill, according to a statement made yesterday by James Rees, superintendent. This gold holding is situated in the Congress belt, and runs parallel with a mineral system, the product being identical in character to the former. Mr. Rees said that results obtained in reopening the old workings have been gratifying, and steady milling for many months is ahead of the plant. The main development zone in recent months has been in the west drift, where a depth of 1,300 feet has been reached. From this level an upraise is now being made, and favorable conditions are in evidence. The Wakota is more familiarly known as the Coronado, and a new organization recently took over the old group.

MANY MINING PROPERTIES LISTED

(From Friday's Daily.)

More than 120 mining properties and groups of claims have been filed with the Chamber of Commerce to be listed in pamphlet form and distributed throughout the mining and financial world. Within the next few days these will be in shape and ready to be printed. A map of the mining sections of Yavapai county will probably accompany this list, together with a short introduction relative to mining conditions and the advantages of mining in Yavapai county.

Almost every day new specimens are sent to the Chamber of Commerce exhibit from the various mining districts. Yesterday specimens were received from John McKinnon's property, the Last Chance mine, Hassayampa district, the assays of which run high in gold and silver. From the Mountain View property, owned by John Heminger, specimens of high grade gold, silver and copper were added to the exhibit and from J. T. Anderson, owner of the Four Metals mine, located near Morristown, specimens of molybdenum and zinc were also received.

IS PUT TO WORK

(From Friday's Daily.)

Captain E. A. Seelye said yesterday that 15 men had been put to work on his Richinbar mine property, 12 miles from Cordes, the first of this week. The road to the copper property is being put in shape and it is expected that the 20-stamp mill will be placed in operation within a month.

2 MEN HELD AS SAFE BLOWER SUSPECTS

SEARCH FOR MEN WHO BLEW SAFE IN CAMP VERDE STORE RESULTS IN ARREST OF EX-CONVICT; IS SILENT.

(From Saturday's Daily.)

Lee Cuthbert and Jim West, suspected of having blown the safe in the Camp Verde store Tuesday morning are held in the county jail. Cuthbert was arrested at Pete Haugh's ranch, six miles from Payson by Bud Armer, a deputy sheriff of Gila county, who accompanied Les Clayton, the cowboy deputy of Camp Verde in this county. West was arrested near Humboldt by Deputy Charles Kirsman and turned over to Under Sheriff Tom Marks late Thursday night at Humboldt.

Cuthbert, who was brought from Payson by way of Phoenix, would make no statement when taken from the Santa Fe train late last night. Only \$20 was found on him, about the same amount found in West's possession.

Cuthbert served two years in the Florence penitentiary for horse-stealing, it is claimed. He has been in the Yavapai county jail and also the Gila county jail at Globe, it is alleged. He has been a cowpuncher and cattleman in this part of the State for years and knows every water hole in the country, say officers.

Jim West has never been in jail before, as far as the knowledge of the local officers goes. His brother, William, was in Prescott yesterday vouching for him. He said that Cuthbert had been employed on his ranch until last week.

According to statements of residents of the Cherry Creek district, Cuthbert was seen repairing a fence on the West range, Monday morning. West is supposed to have arrived at the ranch Sunday or Monday. Added to this, is the fact that Cuthbert was seen at Camp Verde Monday afternoon.

When passing through Camp Verde the latter part of last week, West made purchases at the store. That these purchases will play an important part in the alleged evidence that he was a confederate in the robbery, is the belief of the sheriff's office.

Clayton, who captured Cuthbert, made a trip of 60 miles over hard road, Wednesday night in order to get his man. He took but nine hours to cover the distance.

Jim West, the other suspect, who has known Cuthbert for years, it is said, was on his way to his brother's ranch in the Cherry Creek district, from Idaho, according to the story told the sheriff by the prisoner. On arriving at Globe he went to Payson, from there to Camp Verde and then on to his brother's ranch.

NEW ROAD OPENS UP COPPER FIELD

(From Wednesday's Daily.)

Active road building from the saddle of Copper Basin to Camp McBride, on Copper creek, distant about four miles, started yesterday. This movement is the forerunner of active operations on the copper holdings of McBride & McNulty, and the highway will be utilized principally for shipping out ore. A contract has been awarded for hauling 50 tons per day, and Mr. McBride stated yesterday the Green Mountain claim will be the source of production, where a heavy tonnage is ready.

WAR EAGLE RESUMES NEAR CROWN KING

(From Saturday's Daily.)

Lester Jackson has returned from the War-Eagle-Gladiator holdings near Crown King and states that development has been resumed with a small force. Cleaning out old workings will be the first move toward larger operations decided upon for the future. It is reported the property is under negotiations for a large deal. Other holdings in that region are being examined by engineers.

12 CLAIMS SOLD

For a nominal consideration Jennie A. Frank, of Jerome, has deeded to C. R. Rostine the following claims in the Pine Grove mining district: Tam O'Shanter, Lillian, Spokane, Oregon, Kearsarge, Iowa, Wisconsin, Augusta, Live Oak, Mammoth, Porphyry Mountain and John Warren.

TRANSFERRED TO TAOS

(From Saturday's Daily.)

Assistant Forester Ancona, who is well known throughout this section of the State, and who has been stationed at Crown King is now at Taos, N. M., where he was transferred to the Carson national forest headquarters.

AGAIN ERUPTING

SEWARD, Alaska, May 6.—Mount Katmai, whose eruption in 1912 covered Kodiak with volcanic ash from two to ten feet deep, is reported intermittently active. Ashes have fallen recently at Uyak.
